1 – Drivers try to drive too fast – mitigation – Course car to lead all cars round at max speed of 50 mph

2- Track gets crowded – mitigation – Limit number of cars in parade lap to 100 cars (course car to limit speed appropriately as numbers increase to ensure that all cars have entered track before one lap is complete by keeping in touch with race control by radio)

3- Cars being driven wrecklessly – mitigation – Race control to order end of parade lap and stop course car to neutralise danger. Race control to enter circuit and escort guilty party from venue

4 – An accident occurs and someone is trapped or injured in their vehicle – mitigation – Donington safety crew remain on standby in order to react to any emergency
